Att.:

This letter is to confirm that PROMONTORIO has had an on ongoing positive working relationship with principals and staff at Aquatic Construction AC LTD / Aqualife since 2011. Since that time, we have successfully completed the following projects:

1. Hurgada City Center, my first Dive Aquarium project.
2. The Aegean Odyssey Concept Aquarium at Golden Hall.
3. The Schematic design and LSS engineering for Aquario de Luanda.

We have found the members of Aqualife and their subcontractors to be fully co-operative during the design phase, the delivery phase and to deliver work in conformance with our documentation and specifications. They have solved on-site conditions, have been fair in considering changes and additional work, have co-operated with Clients and Building authorities and have generally delivered work of exceptional quality. In addition, they have continued to respond to problems after commissioning, which often are beyond the requirements of standard warranty.

We would be pleased to recommend Aqualife for future projects.
